FAO: ALL PARENTS / CARERS

10th February 2021

Dear Parent/Carer,

We have been advised by Public Health Wales that there has been an additional confirmed case of COVID-19 in Ysgol Gyfun Cwm Rhondda.

The Year 11 pupil is currently not attending school and, therefore, no school close contact group has needed to be identified.

The process of testing and contact tracing is part of the new normal where schools and settings are required to follow the guidelines carefully as part of the "Test, Trace, Protect" strategy that Welsh Government has adopted.

Please can I reassure you we will continue to be vigilant in adhering to all guidelines so that we can keep all children and staff safe. The health and safety of everyone in our school community is of paramount importance and we appreciate your full support during these times.

We fully appreciate that this continues to be an unfamiliar and anxious time for us all and if you would like further information, please do not hesitate to contact us directly at school.

Yours sincerely,

A handwritten signature in black ink that reads 'Craig Spanswick'. The signature is written in a cursive style and is enclosed within a hand-drawn oval.

Appendix 1: How to stop COVID-19 transmission

If someone you live with is at high risk of severe illness from coronavirus, you should be particularly careful in implementing the following public health measures:

- Ensuring every member of your household washes their hands with soap and water regularly for 20s (or use hand gel sanitiser) and has good respiratory hygiene.
- Aim to keep 2 metres away from vulnerable people you live with and encourage them to sleep in another bed.
- Minimise as much as possible the time any vulnerable family members spend in shared spaces such as kitchens, bathrooms and sitting areas, and keep shared spaces well ventilated.
- If you do share a toilet or bathroom with a vulnerable person, it is important that you clean them every time you use them, wiping surfaces you have come into contact with.
- Clean and disinfect household surfaces regularly, especially 'high touch' surfaces.
- Avoid sharing towels with the vulnerable household member.

Please also remember general public health measures to reduce the risk of infection in our community by:

- Staying at home as much as possible.
- Staying safe outside your home, including by maintaining social distancing (at least 2 metres) when near people who are not your household members.
- Wearing cloth face coverings when in crowded public spaces (e.g. public transport and shops) to protect others.
- Regular hand washing with soap and water regularly for 20s (or use hand gel sanitiser) and good respiratory hygiene.
